Thanks, Dave!

We'll do what we can to get the Final ROD back into your hands asap.

Thanks,

Jeryl

There were no substantive comments from BLM HQ, so we are good from this end.

Dave Davis, Geologist

Hazmat Program Lead

Dante,

So, is that all the comments from HQ?

I have worked up draft responses to these two comments, but am waiting to hear from Jeff, what his thoughts are.

Would you like to call me to discuss other comments to the ROD?

I have not seen other comments yet.

Dave, do you have any comments to relay from BLM?

I would like to complete revisions to the ROD today if possible, and get the Final ROD off to BLM, at latest tomorrow morning if possible.

Thanks,

Amy,

Thanks so much for helping review the Anaconda ROD. We will work on addressing your and Christine's comments right away.

Also, if you could give us a heads-up about any interest in the Anaconda Site by HQ higher-ups, that would be great!

We have been up to our ears putting together materials and briefings for "Kell" Kelly, assistant to the administrator, on every aspect of the Superfund program. I finally got my comments typed in and sent to Christine late Friday.

My 2 biggest issues are: (1) some of the HLPs don't show risk outside of the risk range, what is the trigger for action for those HLPs? (2) In one place the document states that the solids will be left behind, unaddressed, but in other places solids will be removed and reprocessed or closed in the 4-acre Pond. Which is it?

Subject: Status of Anaconda ROD review?

Christine and Amy,
Will you guys be sending me HQ's comments on my draft ROD for Anaconda today? Last week you had indicated that you were delayed until this week. We expect a long approvals process with BLM/DOI involved, so time is becoming tight. Please give me an update - hope to see it today. Thanks!
